

TRANSLATIONAL GLYCOBIOLOGY TOWARDS THE TREATMENT OF CANCER

Thursday, May 9, 2019

**O | 2 Auditorium,
de Boelelaan 1108, Amsterdam,
the Netherlands**

Invited speakers:

Celso Reis (Keynote)

University of Porto, Portugal

Altered glycosylation in cancer: molecular mechanisms and clinical implications

Hans Wandall

Centre for Glycomics, Denmark

Dissecting glycan function using CRISPR-Cas engineered human skin organoids

Erdmann Rapp

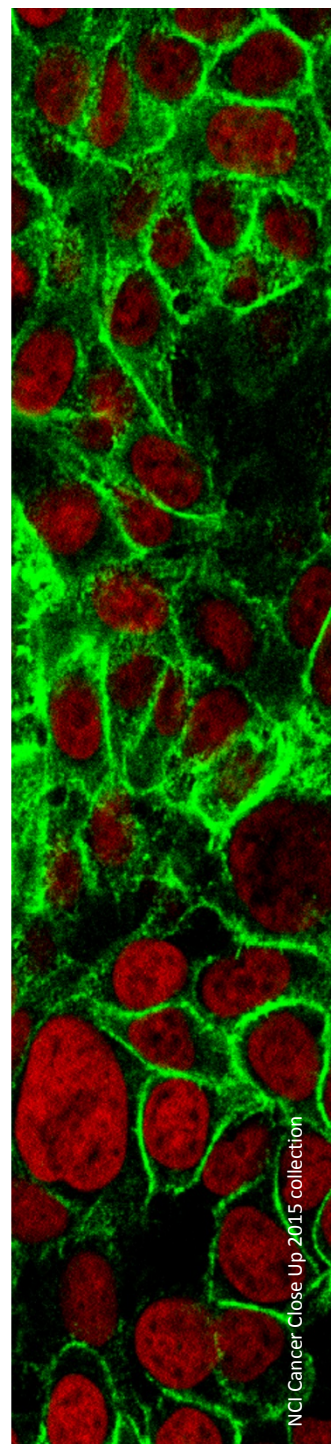

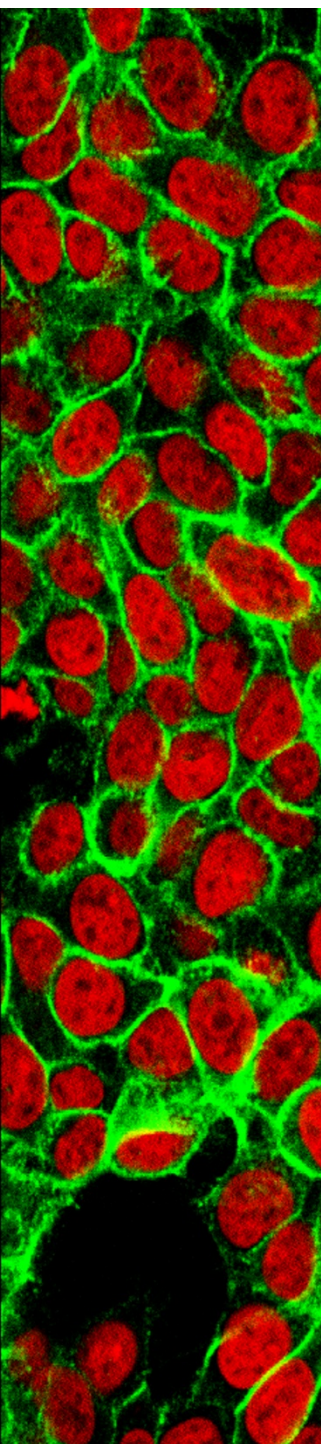

Max Planck Institute for Dynamics of Complex Technical Systems, Germany

glyXboxCE - A powerful tool in the glycoanalytical toolbox

Yvette van Kooyk

Amsterdam UMC, the Netherlands

Glycans as immune checkpoints for cancer immunotherapy
